Mito alto side 70 track DALI connection diagram

A maximum of 64 Mito alto units can be assigned to each DALI circuit.

The Mito alto units can be organized into as many as 16 groups and equipped with an additional 16 scenarios (predefined settings).

Using a DALI short address, they can be actuated and configured individually. In addition, the bi-directional data transfer lets users query the state/status of individual luminaires.

You can find more detailed information at www.occhio.com/dali.

DALI mounting

The pins of the DALI inlay and contacts of the DALI track determine the orientation of the luminaire and the direction of the light output.

Therefore, the contacts of the DALI track need to be oriented towards the intended light output.
