

acoustic panel round 90 datasheet

Round acoustic panel with a diameter of 90 cm to mount directly on the ceiling or suspend using wire cable (maximum of 200 cm).

The polyester fleece panel (with exchangeable stretch material) offers excellent sound absorption qualities that significantly reduce reverberation time in the room, thus improving the acoustics there. Creating a new visual layer also makes it possible to give the room a different look without having to resort to a suspended ceiling.
