To the moon – and beyond

At Milan Design Week 2024, Occhio is presenting Lunanova, its first chandelier – and completely redefining this category. The spherical appearance of the light artwork is an absolute eye-catcher and expressive statement. Axel Meise, Occhio founder and designer, on the novelties for Milan Design Week 2024 – and a new opulence.

What does new opulence mean to you?

Axel Meise: Occhio's design philosophy has always been characterized by purism. With our new **Luna** series, we deliberately broke with our signature design to introduce a much more emotional approach, of course without compromising on the unique quality of light and magical control featured in all Occhio luminaires. **Lunanova** now shows what is possible – rewriting the rules opulence in chandeliers in the truest sense of the word.

What makes Lunanova new and stand-out?

Axel Meise: Lunanova combines spectacular design with innovative technology: dark chrome mirrored Luna glass spheres in various sizes are arranged concentrically on a

mirrored disk. The Occhio fireball float inside the spheres, providing powerful, directed light. And it wouldn't be an Occhio chandelier if Lunanova didn't offer fascinating control possibilities for magical lighting effects that go far beyond anything seen before.

Lunanova can be admired in the Occhio store in Corso Monforte during Milan Design Week. Who is the chandelier for?

Axel Meise: For people who are looking for something unique, who do not compromise in lighting design and are looking for a real statement piece. Available in three different dimensions and both ceiling-mounted and suspended, Lunanova unfolds its power as a centerpiece in high, prestigious rooms – a true interactive art installation.

Mito aura alta

What else can we expect?

Axel Meise: We are still in the course of launching our new series **Luna** – the feedback from customers has been simply overwhelming. Luna leads us beyond our solar system to a new galaxy of light. The symbiosis of classic shapes, new stylish surfaces, unseen lighting effects and state of the art technology is unprecedented. Luna opens up completely new application areas – and lets everyone immediately fall in love.

With **Occhio fireball** we even invented a new light source. The frosted glass sphere shines bright at the firmament. But if you get closer you will notice it provides a soft, glare-free spotlight effect. It's just magical, even for lighting specialists.

We are also presenting the new **Coro** series. With this series, we are taking our design philosophy to the extreme: It completes our product portfolio with smaller, very slim pendants as well as highly sophisticated recessed and surface mount spotlights. Most Coro luminaires have a zoom optic for perfect lighting effects.

You will find all the features and virtues of Occhio in this new, unique series – from »touchless control« to Occhio air and »color tune«.

Combined with our Occhio fireball technology, it becomes **Coro moon**. It's impressive to see that you can direct the light anywhere without changing the position of the sphere – and the »color tune« option makes it even more versatile.

As a cloud in various sizes or as a new 'spider cloud', Coro and Coro moon pendant luminaires transform into unique light installations above tables and in rooms. It is a unique experience to change their brightness and light color orchestrated by gesture or at the touch of a button.

Last but not least: with **Mito aura alta**, our centerpiece of the Mito series gets an extension, designed for high-ceiling rooms. The characteristic Mito ring seems to float in the room – and transforms it into a magical place with its changeable light.

Occhio – culture of light

Occhio stands for outstanding design, a unique quality of light and unprecedented 'joy of use'. Founder and Designer Axel Meise started out with an idea that was as simple as it was revolutionary: to create a holistic luminaire portfolio which is consistent in design, material and quality of light – and provides the perfect lighting solution for every situation in private as well as in commercial living spaces.

Founded in 1999, Occhio has developed from a German design icon into an international lifestyle brand in the luxury industry. But the bold mission has been the same from the beginning: creating a new culture of light – to enrich people's quality of life!

Luna

Light from another world

Magical. Stylish. Playful.

Luna – an experience outside of this world: At first glance, sensual and mysterious. At second glance, a masterpiece of lighting technology – made possible by the magical Occhio fireball light source, which floats like a celestial body in the shining glass sphere.

Just like magic: It only takes an intuitive gesture to turn Luna sospeso on or off, dim it, or change the color temperature.

Luna sospeso pendant luminaires are available in three sizes. The luminaires can be grouped individually or configured as a cloud solution with 3 or 5 luminaires for round and rectangular tables.

Luna sospeso cloud

Luna scura atmospherically reflects the light to the wall. The light source seems to float in the mirrored sphere.

The moon – a source of inspiration

Luna transforms a room in a space of beauty and light – and opens a world of completely new possibilities.

Thanks to »color tune« the atmosphere of the light can be changed from warm to stimulating cool via the Occhio air app or controller.

Luna piena – a source of decorative glow, but it also provides soft directional light to create the perfect atmosphere.

Luna parete fascinates without words:
Its beauty touches the senses, and its
light breathes magic into space.

Luna parete

Luminaires that transcend beyond its decorative purpose – **Luna** elevates the lighting experience to a whole new level of wonder and joy.

Luna sogno – like in a dream, the light source appears in the center of the mirrored glass sphere, which reflects the light softly back to the surface. It responds to intuitive gestures – and makes wishes come true.

Luna basso – accentuates additionally rooms through powerful uplight.

Luna luminaires are available in the stylish surfaces dark chrome and phantom.

Occhio

presents

LUNANOVA

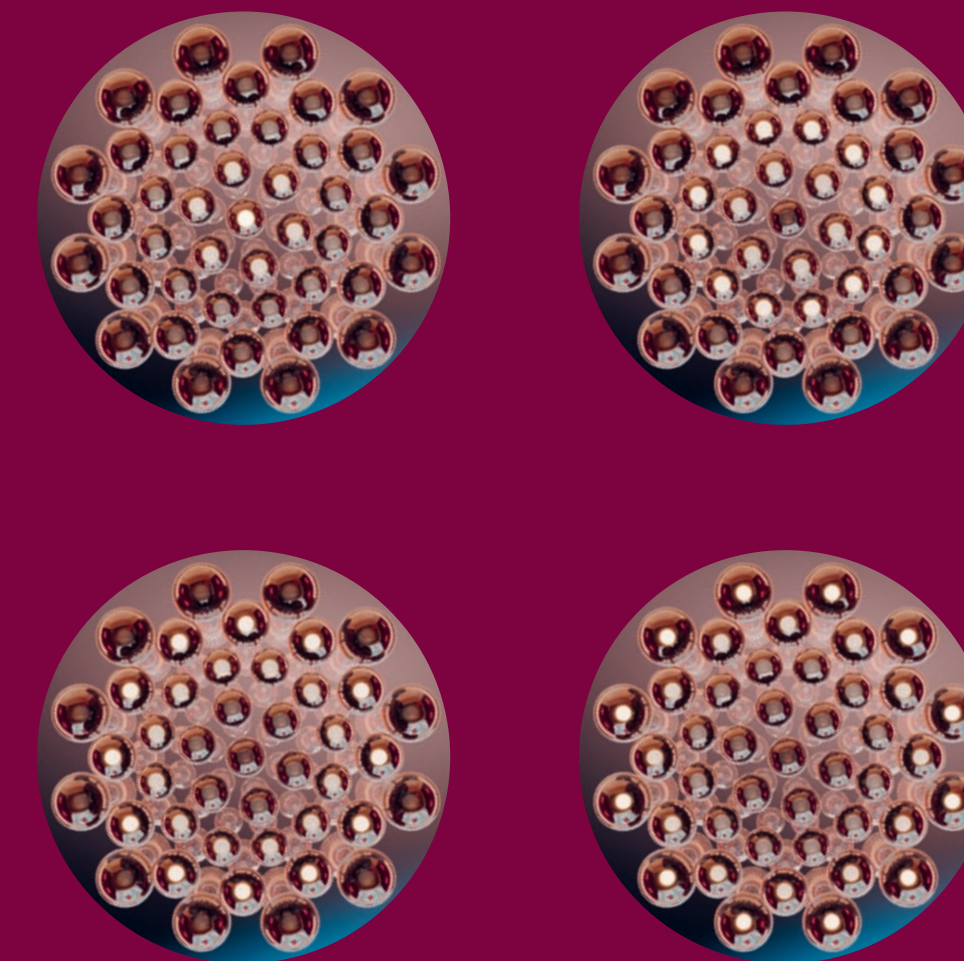

Chandelier redefined

In tre diverse dimensioni, a sospensione o a soffitto:
Lunanova regala agli ambienti una nuova forma di opulenza:
un oggetto luminoso e una dichiarazione di design.

Let the magic happen

Controllo della luce per effetti luminosi spettacolari: Con
Occhio air e 'supernova effect', la luce di Lunanova
può essere spostata dall'interno all'esterno e modificata
magicamente.

Coro moon sospeso

The magic of the moon: Coro moon

Thank you nature for being such an inspiration: From the cool glow of the moon to warmer atmosphere, everything is in flux thanks to Occhio fireball and its adaptable color temperature. True magic.

Occhio fireball is a groundbreaking new light source which provides soft surround light as well as glarefree spotlight effect at the same time.

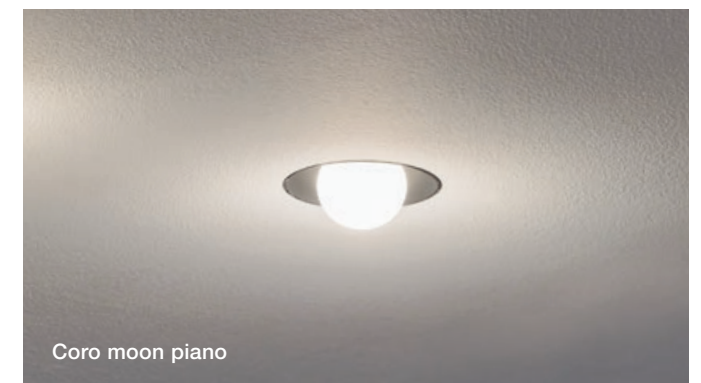

Pure innovation – sensors on the luminaire head let you be the conductor of the atmosphere.

Coro moon alto – a source of light
and a source of fascination.

Let the magic unfold – like the
rise and setting of the moon.
Coro moon can change atmos-
phere as if by magic.

Whether recessed or surface-mounted spotlight,
whether as spotlight or as downlight: Occhio
fireball always remains in the center, but the light
is wherever you need it – simply ingenious.

»**color tune**« – always the mood that you need:
With Occhio air you adapt the color temperature.

Coro sospeso

Zoom optic for perfect focus

Minimalism – redefined

Iconic, understated, floating, ideally performing as an ensemble: **Coro** offers not only pendant luminaires, but also a range of recessed and surface mounted spotlights. The design of the series is so slim that you wonder how we accommodated it all – from »touchless control« and »color tune« to zoom optic.

Coro is elaborated to the finest detail, available in fascinating colors and materials. State of the art lighting technology combines zoom optic with »color tune« options.

With the power of zoom, **Coro alto** becomes a versatile lighting tool that can be tuned precisely to meet every situation.

A further development of minimalism. The minimalist design of **Coro** spotlights does not exclude powerful features and captivating lighting effects – proving that less can truly be more.

Coro recessed and surface-mounted spotlights offer impressive lighting design options – with fixed lens optics or swiveling zoom and »color tune« options. Fascinating surfaces and color combinations allow Coro to perfectly merge with its surroundings.

Coro piano
